INTEROPERABILIDAD

INTEROPERABILITY MAGAZINE PORTAL FUNCTIONAL REPORT

CCS-2024

This document describes the set of steps that show the operation of the portal of the journal "INTEROPERABILITY", from the registration of a reader user, as well as the application as an aspiring researcher or referee; going through a series of processes from the moment of delivery of the documents and their review, approval or denial by the Editorial Committee, in order to take the course: "TRAINING FOR RESEARCHERS AND REFEREES"; with the purpose of providing training in the regulations and management of the editorial line of the journal, for the publication of their articles.

For this purpose, we invited a selective group of researchers, enthusiasts, professionals and academics who will publish in the journal. Obtaining, the implementation of the functional platform, the registration of researchers and the online course (test mode) as a requirement requested by milestone #4 of the digital refereed scientific journal "INTEROPERABILITY".

The following is a description of the different screens of the "INTEROPERABILITY" magazine portal.

This main interface of the interoperability portal displays the first phase of the menu presented on the page. It features registration and login administration buttons, as well as social network icons and the current date.

In addition, it invites you to get to know its nine (9) lines of research, along with a basic registration form for a new reader; requesting name, surname, email and ID number. This will indicate the beginning of the session leading to the main registration, then the new reader is asked to complete their data, such as profession, academic level, country, state and address.

At the bottom of the page the section of our allies is highlighted and again the social networks and the drop-down menu appear.

This section shows more information about our magazine in reference to its purpose, objective, scope and periodicity.

INTEROPERABILIDAD

This section shows the publication standards of the journal, explaining to the reader the parameters used for the articles according to their respective lines of research.

This section shows the cover of the current edition of the journal, where the summary of the different articles included in that edition will be presented.

INTEROPERABILIDAD
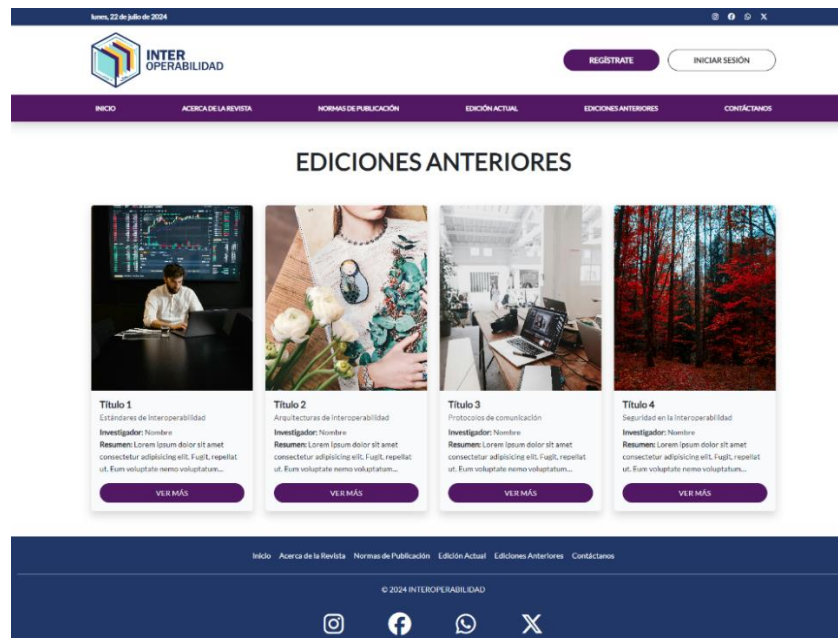

This section shows the covers of previous editions of the magazine, with respective summaries of the different articles included in those editions.

This section shows the covers of previous editions of the magazine, with respective summaries of the different articles included in those editions. This section presents the organization's contact information, such as location, address, telephone number and e-mail address. An interactive map of the organization's current location is also included.

In this screen the user will be able to enter the system with his data, such as e-mail and password, allowing him to access the user panel and according to his authorization, only certain pages will be shown.

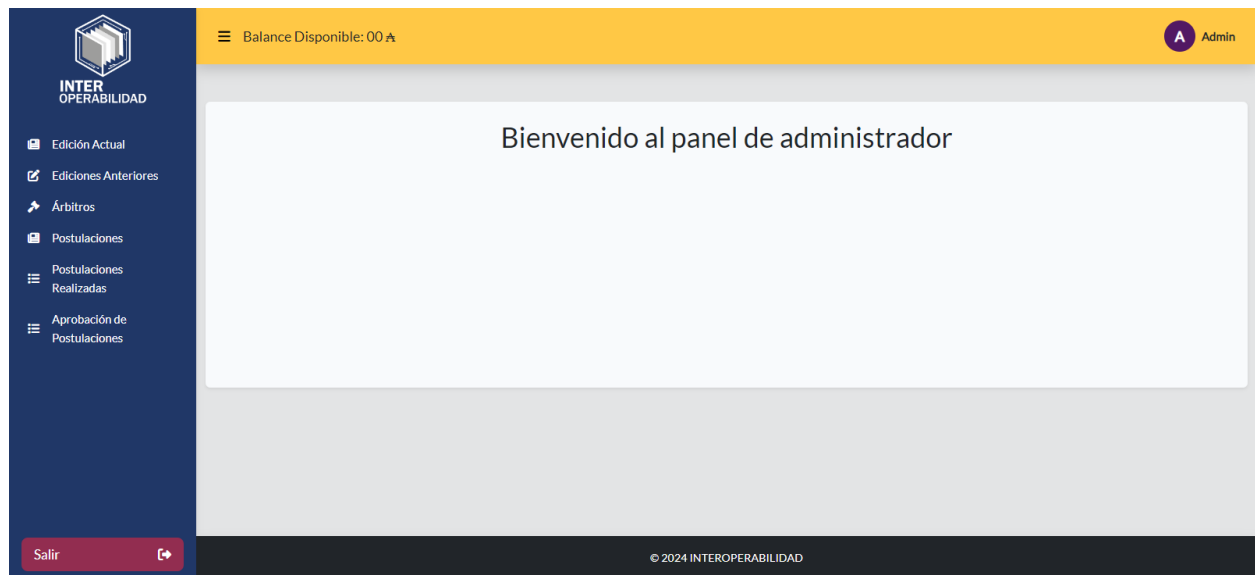

This view, once a new user has been captured, shows the form in which he/she must complete his/her data in order to enter the system with a reader profile.

INTEROPERABILIDAD

This screen points to the user panel where you can see the administrator profile, a header that shows what is the balance available in ADAS, because it is linked to the connected Wallet. In addition, you can see what is a side menu, the user's name and the content, mainly showing what are the title, previous editions, referees, nominations, nominations made, approved and the Exit tab.
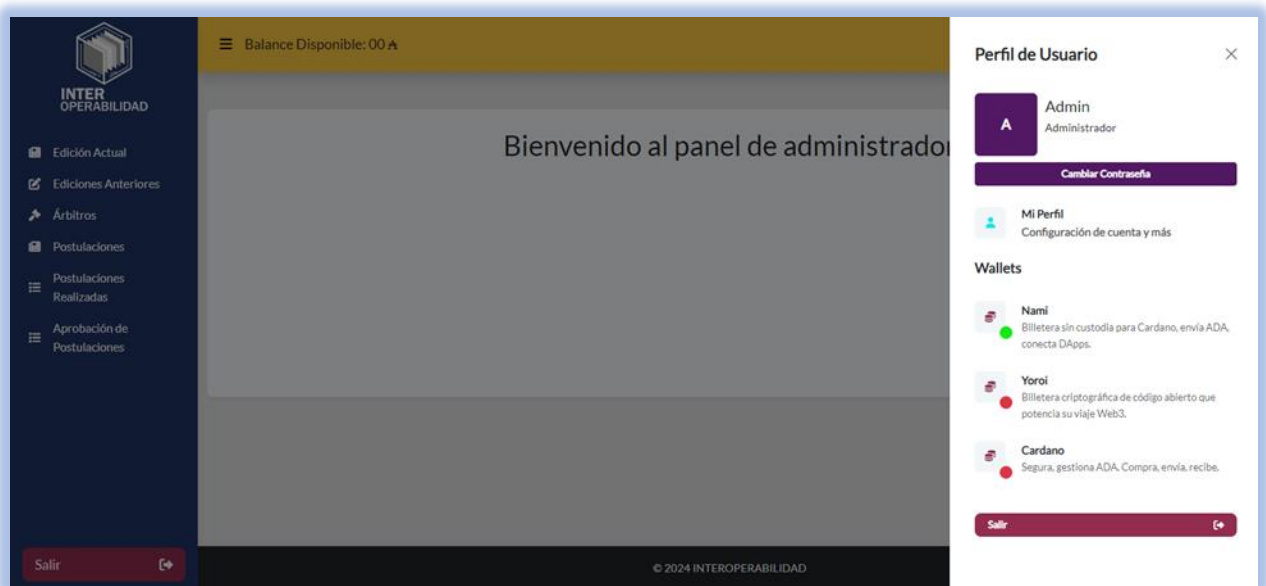

In this section, the user's profile is displayed from the administrator panel, in the mini screen on the right side, which allows observing the connection with the wallet, where the Nami is in green color indicating that it is active. It also shows the other wallets that in the future will have functionality for such connection,

in that screen there is an exit label. In the main menu of the screen you will find: Current Edition, Previous Editions, Referees, Applications made, Approval of applications and the Exit label.

Continuing with the user panel of the administrator profile, there is a header with the balance available in ADAS, the referee portfolio is displayed in test mode, which describes a set of records composed of an ID, FIRST NAME, LAST NAME, IDENTIFICATION NUMBER, MAIL, TELEPHONE, INSTITUTION, ACADEMIC LEVEL, COUNTRY AND STATES. In addition, it continues with the side panel containing Current Edition, Previous Editions, Referees which displays two options: Referee Portfolios and Referee by Edition, Applications, Applications Made and Approval of Applications.

In this section the reader can register or generate his/her application to become a researcher, the registration form is shown. Part of the data was provided at the time of registering as a reader, two questions are added according to the researcher application. On the other hand, you must choose the line of research in which you wish to publish. Also attached are the different documents requested, which are: Abstract, Proof of Originality, Proof of Audit Agreement, Permission for Dissemination, Dissemination of the Article, photo and identification, either identity card or DNI.

It should be noted that each of these documents must have a maximum of two megabytes in PDF format.

In this section a reader can register or generate his or her application to be a referee, the registration form is shown, part of the data that were provided at the time of registering as a reader, four (4) questions are added according to the application for referee, which are shown on the screen. On the other hand, you must choose the line of research in which you wish to referee. You must also attach the different documents requested, which are: Academic Data, curriculum summary, proof of publication support, identification (identity card, passport or DNI), then click on the save button to save the requested documents.

It should be noted that each of these documents must have a maximum of 2MB in PDF format.

This section shows a list of the applications made, which contains the following data: ID, Date of Application, Type of Application, First Name, Last Name, ID No., Status and actions, as well as a side menu with Current Edition, Previous, Referees and Applications Made and at the end the Exit tab.

This section shows a list of the Approval of Nominees, which contains the following data: ID, Date of Nomination, Type of Nomination, First Name, Last Name, ID No., Status and actions. It also shows a side menu with Current Edition, Previous Editions, Referees and Nomination Performed, Approval of Nominees, which is shown in the image and at the end the exit label.

Postulaciones / Postulación para Investigador

Estatus de la Postulación:
APROBADO

Para continuar con su postulación debe realizar el curso:

FORMACIÓN A INVESTIGADORES Y ÁRBITROS PARA LA PUBLICACIÓN DE ARTICULOS EN LA REVISTA CIENTIFICA ARBITRADA DIGITAL "INTEROPERABILIDAD"

IR AL CURSO

Información del Curso

CURSO EN LINEA	COORDINADOR(A): FACILITADORES:
MODALIDAD: Online **HORARIO:**	**DURACIÓN:**

DIRIGIDO A:
Entusiastas, investigadores, científicos, comunidad y público en general interesados en las líneas de investigación de la revista; como parte de la masificación de la información y de la socialización del conocimiento de CARDANO- blockchain.

OBJETIVO:
Formar a los participantes con contenidos actualizados y con preponderancia en la normativa para la publicación y evaluación de artículos acorde a las líneas de investigación de la revista científica arbitrada digital **"INTEROPERABILIDAD"**.

JUSTIFICACIÓN:
Dada la importancia de conocer el manejo en cuanto a las normas y estructuración de la publicación de los artículos y la evaluación de los mismos, nos lleva a la formación ineludible de los participantes interesados en ser parte de la revista **"INTEROPERABILIDAD"**.

PERFIL DE EGRESO:
Un participante con los conocimientos, habilidades y capacidades en la elaboración y evaluación de artículos cónsonas a las líneas de investigación la revista científica arbitrada digital **"INTEROPERABILIDAD"**.

MÓDULO 1: Acerca de la revista / Facilitador. (2 Horas). Ant. Francis García.
PROPOSITO: Dar a conocer la finalidad, alcance y sus líneas de investigación de larevista "INTEROPERABILIDAD" como parte de la gestión del conocimiento en materia de Blockchain de tercera generación.
TEMAS:
1. Propósito y objetivo de la revista "INTEROPERABILIDAD"
2. Alcance, periodicidad y estructura de la revista "INTEROPERABILIDAD"
3. Líneas de investigación de la revista "INTEROPERABILIDAD"

MÓDULO 2: Normas editoriales / Facilitador. (6 Horas). Msc. Lennys Blanco.
PROPOSITO: Orientar sobre los procesos y normativas para la publicación de los artículos de la revista "INTEROPERABILIDAD"
TEMAS:
1. Normas Editoriales
2. Formato de los artículos
3. Citas y refrencias bibliográficas
4. Ética en la investigación

MÓDULO 3: Arbitraje / Facilitador. (5 Horas). Msc. Félix Davila.
PROPOSITO: Orientar sobre los procesos y normativas para el arbitraje y evaluación de los artículos de la revista "INTEROPERABILIDAD"
TEMAS:
1. Perfil del árbitro
2. Evaluación por pares
3. Criterios y formatos de evaluación
4. Gestión de revisiones y comentarios
5. Retroalimentación constructiva

MÓDULO 4: Propiedad intelectual y estándares internacionales / Facilitador. (3 Horas). Msc. Wilmer Varón.
PROPOSITO: Dar a conocer en marco regulatorio para la protección, creación e innovación de la producción intelectual para los artículos publicados en la revista "INTEROPERABILIDAD", garantizando los derechos de propiedad intelectual a nivel internacional.
TEMAS:
1. Introducción a la propiedad intelectual
2. Tipos de propiedad intelectual
3. Protección de derechos en la investigación científica
4. Ética y propiedad intelectual
5. Casos prácticos y estudios de Caso

Requisitos para la Certificación del curso	Evaluación	
Poseer registro favorable en su desempeño y una asistencia con participación activa al menos en un noventa por ciento (90%).	1. Aprendizaje síncrónico y asincrónico 2. Total	15% 25%
Demostrar en su actuación la aplicación de lo aprendido en el curso, a través de evaluaciones continuas y prácticas integrales, que comprenda lo teórico, lo práctico, lo investigativo y lo social.		25% 15% 20%
Cumplir con todas las asignaciones y ejercicios durante el desarrollo del programa.		100%
Obtener calificación mínima aprobatoria de dieciséis (16) puntos en la escala del 0 al 20.		

In this section Researcher's Application section, a side menu is displayed with Current Edition, Previous Edition, Referees, Applications, this option displays a sub menu with the options of application for researcher and application for referee, keeping active the options applications made, approval of applications and the Exit tab.

By clicking on the tab Postulation for Researcher, a form is displayed where the applicant can visualize the content of the course (coordinators, facilitators, target audience, duration, objective, justification, exit profile, content of each of the modules); as well as the requirements for the certification of the course and the evaluation. To end this module or screen click on the Exit tab.

INTEROPERABILIDAD

In this section, Referee Application, shows the display of the side menu with Current Edition, Previous Edition, Referees, Applications, this option displays in turn, a sub menu with the options of application for researcher and application for referee, keeping active the options applications made, approval of applications and the Exit label.

By clicking on the tab Postulation for Referee, a form is displayed where the applicant can visualize the content of the course (coordinators, facilitators, target audience, duration, objective, justification, exit profile, content of each of the modules); as well as the requirements for the certification of the course and the evaluation. To end this module or screen click on the Exit tab.

INTER OPERABILIDAD

Estimado:

La revista **"INTEROPERABILIDAD"** le da la más cordial bienvenida a su portal y le invita a conocer sobre esta aventura científico tecnológica y de gestión de conocimiento en materia de Blockchain.

Atentamente,

Comité Editorial
